

PHANEENDRA GANJI

AI/ML Engineer

WA | (561) 759-7282 | Phaneendraganji3@gmail.com | [Portfolio](#) | [Linkedin](#)

SUMMARY

AI/ML Engineer with 4+ years of experience designing, deploying, and scaling machine learning and generative AI solutions across enterprise environments. Proven track record of building production-grade AI systems using Azure OpenAI, GPT-4o, Microsoft Fabric, Flask, and Azure Kubernetes Service, delivering measurable impact including 35% faster incident response, 40% reduction in manual processing, and 93%+ document extraction accuracy. Strong foundation in ML and deep learning using Python, Scikit-learn, XGBoost, LightGBM, TensorFlow, and PyTorch, with experience in NLP, computer vision, OCR pipelines, anomaly detection, and Retrieval-Augmented Generation architectures.

SKILLS

Programming Languages: Python, SQL, R, Java

Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost, LightGBM, CNN, RNN, LSTM, Autoencoders, Transformers, Model Evaluation, Bias and Error Analysis

Generative AI & Natural Language Processing: Large Language Models (GPT, BERT, LLaMA), LangChain, Hugging Face Transformers, Prompt Engineering, Retrieval-Augmented Generation (RAG), Embedding Generation, Vector Similarity Search, LLM Fine-Tuning, Text Classification, Semantic Search

Computer Vision & Image Analytics: OpenCV, Image Preprocessing, Data Augmentation, Object Detection (YOLO, EfficientNet), Image Segmentation, Feature Extraction, Real-Time Inference Pipelines

Data Engineering & Analytics: Pandas, NumPy, SQLAlchemy, ETL Pipeline Development, Feature Stores, Data Wrangling, Statistical Modeling, Data Quality Validation

MLOps, DevOps & Cloud Technologies: AWS SageMaker, EC2, Lambda, Docker, Kubernetes, Apache Airflow, Git, Jenkins, CI/CD for Machine Learning, Model Versioning, Model Monitoring, Drift Detection, RESTful APIs

Data Visualization & Reporting: Power BI, Tableau, Matplotlib, Seaborn

EDUCATION

Master of Science in Data Science and Analytics Florida Atlantic University	May 2024
PG Diploma in ML and AI IIIT Bangalore - Bangalore	2020 2021
Bachelor of Engineering in Computer Science Sphoorthy Engineering College, India	July 2020

EXPERIENCE

iLink Digital Inc, WA | Jan 2025 – Current | AI Engineer

- Implemented anomaly detection using Microsoft Fabric and integrated an RCA chatbot with Azure OpenAI, streamlining IT operations and improving incident response time by 35%.
- Built a Flask-based invoice processing solution with Azure SQL and Blob Storage, reducing manual effort by 40% and enabling scalable document management.
- Containerized applications with Docker, deployed via Azure Kubernetes Service (AKS), and automated CI/CD pipelines, ensuring 98% uptime and consistent, error-free deployments.
- Engineered a GPT-4o–driven OCR pipeline, achieving 93% extraction accuracy and 94% categorization accuracy across diverse invoice layouts, enhancing automation efficiency.
- Partnered with business stakeholders to align AI prototypes with client objectives, enabling the adoption of production-ready solutions that improved financial workflows and operational decision-making.

Yogaya Inc, USA | May 2024 – Dec 2024 | Cloud Solution Engineer

- Integrated an Alexa skill with AWS backend (S3, DynamoDB, API Gateway, Lambda), delivering seamless voice-enabled experiences for end users.
- Designed and implemented a scalable AWS data architecture, supporting rapid growth while maintaining high availability and fault tolerance.
- Optimized AWS resource management with auto-scaling and monitoring, reducing operational costs by 20% without sacrificing performance.
- Enhanced deployment reliability by implementing CI/CD best practices and automating infrastructure provisioning for faster, error-free releases.

Omdena, USA | Jan 2024 – Mar 2024 | Lead Machine Learning Engineer

- Directed a team of six to design and develop a Mental Health Chatbot using LLama2 and Mistral, achieving a 20% improvement in patient recommendation accuracy.
- Enhanced chatbot intelligence by integrating a RAG pipeline with domain-specific data sources, improving context relevance and response quality.
- Implemented RASA framework with voice assistance features, boosting usability and accessibility for diverse user groups, and delivered a production-ready LLM solution within 3 months, showcasing rapid prototyping and deployment capabilities in an Agile environment.

Infinite Infolab, India | Jan 2020 - July 2022 | ML Engineer

- Developed and deployed machine learning models using Python, Scikit-learn, XGBoost, and LightGBM for predictive analytics use cases, achieving 30% performance gains over baseline statistical models.
- Built computer vision pipelines using OpenCV, CNN-based architectures, and data augmentation techniques to support object detection and image classification systems with 90% validation accuracy.
- Designed ETL workflows and feature engineering pipelines using Pandas, NumPy, and SQLAlchemy, improving training data consistency and reducing data-related model failures.
- Implemented deep learning architectures, including CNNs and LSTMs for time-series and image-based problems, improving model generalization across unseen datasets.
- Partnered with analytics and engineering teams to translate business requirements into production-ready ML solutions, ensuring alignment between technical outputs and client objectives.

CERTIFICATIONS

PG Diploma in ML & AI – IIIT Bangalore
Complete MLOps Bootcamp
Neural Networks and Deep Learning
Databricks Certified Data Engineer Associate
AWS Fundamentals
Python Programming
